Internships and Projects

Internship-1: Artificial Intelligence

In my first year of Engineering I took this 3 months Internship from 1stop organization. I got familiar on how to use Google Collab and Jupiter NoteBook. I got to know the oversights on how datasets are fed to program to get output. Internship Evaluation was based on developing a handwriting recognition and face recognition systems.

Internship-2: Front-End web Development

At the end of my First year I took this 4 weeks Internship program from JV Global services Pvt.ltd, Banglore. This intenship helped me to learn few basic concepts of HTML,CSS and JavaScript. Finally we developed an website for Task Management.

Internship-3: Innovation and Entrepreneurship

At the end of my Second year I attended this 4 weeks Intership program from Inventron Technologies, Banglore. This helped me to get some knowledge on the structure of the organization and steps in building an own Enterprise. By the end of this Intership we pitched an Idea of Booking Nancy to home through an application.

Project-1: Smart Shoe

This project helped me to know about usage of micro-controller boards, Ultrasonic sensors and GPS module. This helped to learn the concepts of Object-Detection and working of a GPS module.

Mini Project: E-Commerce Website

I am currently working on developing a fullstack E-Commerce website for sales and order handling. This is helping me to get a good knowledge on designing Front-End using HTML, CSS, JavaScript and handling databases using flask framework on server side.

Language	Skills
Kannada	Intermediate C
English	Data Structures using C
Hindi	Basic HTML,CSS
	Basic flask framework
	DBMS
	OOPS in Java
